Highly motivated frontend developer with 2+ years of experience using Angular and React to build responsive, user-friendly web applications. Passionate about staying up-to-date with the latest technologies and best practices.

## Professional Experience

June 2022 - Present

**Frontend Web Developer** Cognizant

- **Pixelgram:** Collaborated on a full-stack project using Angular and SpringBoot technologies to develop a responsive web application that allowed users to upload, view, and interact with images. Contributed to the project by implementing various features and functionalities, including user authentication, image filtering, and search functionality.
- **Flow E:** Contributed to the development of an in-house project management tool that streamlined the process of allocating employees to projects and transitioning their training period to working with clients. Developed the front-end using React and implemented various features, including project and employee management, task tracking, and reporting.
- **Audio Sentiment Analyst Tool:** Contributed to an in-house machine learning tool that analyzes voice sentiment to expedite customer help depending on their tone. Utilized Python and various machine learning libraries, including TensorFlow.js to develop and train the model. Worked with the team to collect and preprocess data, including recordings, to optimize the model's accuracy.

## Education

2017 - 2021

**Bachelor's degree in Computer Engineering** The University of Texas Rio Grande Valley

2015 - 2017

**Associate's degree in Computer Science** South Texas College

## Key Skills

- Proficient in HTML, CSS, and JavaScript and TypeScript
- Experience with front-end frameworks such as React, Angular
- Familiarity with responsive design and mobile-first development
- Experience with version control tools such as Git
- Familiarity with testing and debugging tools such as Jest or Chrome DevTools
- Understanding of UX design principles and best practices
- Familiarity with cloud platforms such as AWS
- Familiarity with RESTful APIs and microservices architecture
- Understanding of database management systems such as MySQL

## Personal Projects

- **JBook:** Worked in the development of a documentation tool that allowed users to add notes and code snippets and receive results in real-time.
- **LeafyBuddy:** Worked on a single-page e-commerce application that allowed users to browse and purchase plant products. Designed and implemented a Twitter-like feed feature, which allowed users to share their plant-related experiences and interact with each other
- **RioVax:** Collaborated on a cross-platform mobile app using Flutter that helped users track COVID-19 vaccine hub locations and expedite appointments during the pandemic. Developed the frontend using Flutter and the backend Google FireBase. Implemented various features, including geolocation, push notifications, and appointment scheduling. Received great reviews from users and was voted best senior software project at the University of Texas Rio Grande Valley.
