WORK EXPERIENCE

Cognizant

Plano, TX

Frontend Developer

2022 – Present

- Pixelgram: Collaborated on a full-stack project using Angular and SpringBoot to create a responsive web app for image upload, viewing, and interaction. Implemented features like user authentication, image filtering, and search functionality.
- Flow-E: Contributed to an in-house project management tool that streamlined employee allocation and training transitions resulting in a 25% reduction in administrative time. Built the React front-end with features like project and employee management, task tracking, and reporting.
- SER: Contributed to an in-house voice sentiment analysis tool using Python and machine learning libraries. Collected and preprocessed audio data, optimizing model accuracy up to 75%.

Office Depot

McAllen, TX

Seasonal Sales Expert

June 2021 – December 2021

- Served as a stocker at Office Depot, ensuring shelves were properly stocked and organized to meet customer demands.
- Assisted customers by answering their questions, providing product information, and offering recommendations based on their needs.

Metro by T-Mobile

San Juan, TX

Mobile Expert

December 2019 – March 2021

- Managed cash transactions and ensured accurate accounting for daily sales at Metro by T-Mobile store.
- Oversaw device logistics, including inventory management, stock replenishment, and coordinating device activations and repairs.

Chick-Fil-A

Pharr, TX

Mobile Expert

November 2018 – October 2019

- Managed order taking and provided exceptional customer service at Chick-fil-A, ensuring accuracy and efficiency in processing customer orders.
- Adapted quickly to changing priorities, multitasking effectively to balance order taking, food delivery, and restocking duties.

PERSONAL PROJECTS

RioVax

- Collaborated in RioVax, a cross-platform application using Flutter, to assist users in locating vaccination hubs and accessing real-time information during the COVID-19 pandemic.

LeafyBuddy

- Created LeafyBuddy, an e-commerce application for plant products and services. Implemented a Twitter-like feed for users to interact and share content. Created using Angular and Bootstrap for the frontend and utilized AWS for the backend infrastructure.

JBook

- Developed JBook, a React-based application that enables users to create notes and utilize an IDE-like feature to compile code and import libraries for enhanced functionality.
